ACTIVITIES & INTERESTS

I have an avid interested in all of the latest digital technologies which create new and interesting interactive experiences. In my free time I enjoy skateboarding as well as filming and photographing other skaters. My favourite TV/ film genre is documentaries, in particular anything about animals, physics or outer space. I am also passionate about drum & bass and love attending live shows to watch the projection mapping and light shows which compliment the music.

PROJECTS

Salisbury Cathedral Magna Carta Application

As a university project I created an iOS app for use by Salisbury Cathedral about the 800th anniversary of the signing of the Magna Carta. In this project I was the lead developer and wrote the code for the app itself. The app was one chosen out of the 10 produced to be used by Salisbury Cathedral as a stand alone iPad app to be displayed alongside the Magna Carta in their exhibition.

More details about this project are available upon request.
